
full-NLOS users, surface 180x180 (synthetic): angle prior known: informed t-SNE training, hybrids and searches within the user clusters
t-SNE (LUT beam)
t-SNE + 2 neighbours
t-SNE + 4 neighbours
t-SNE + 6 neighbours
greedy search, clusters only
hierarchical search, clusters only
EMS1 trained alone
EMS2 trained alone
joint training, EMS1 view
joint training, EMS2 view
joint training, both EMSs serving
(angles pooled over EMS1 and EMS2)
median pointing error [beamwidths]
RMSE pointing error [beamwidths]
median SNR gain [dB]
exhaustive
total sweeps
