
full-NLOS users, surface 240x240 (synthetic): informed t-SNE (solid) vs searches (dashed), grey = pure t-SNE with other trainings
t-SNE + verify (proposed beam measured)
t-SNE (1 acq.) + verify + neighbour search
t-SNE (3 acq.) + verify + neighbour search
t-SNE (6 acq.) + verify + neighbour search
greedy search, clusters only
hierarchical search, clusters only
hierarchical search, full codebook
t-SNE + verify, random training
t-SNE + verify, coarse-to-fine training
EMS1 trained alone
EMS2 trained alone
joint training, EMS1 view
joint training, EMS2 view
joint training, both EMSs serving (angles pooled over EMS1 and EMS2)
median angle error [deg]
RMSE angle error [deg]
median SNR gain [dB]
exhaustive
total sweeps
