
full-NLOS users, surface 60x60 (synthetic): angle prior known: informed t-SNE training, hybrids and searches within the user clusters
t-SNE + verify (proposed beam measured)
t-SNE (1 acq.) + verify + neighbour search
t-SNE (3 acq.) + verify + neighbour search
t-SNE (6 acq.) + verify + neighbour search
greedy search, clusters only
hierarchical search, clusters only
EMS1 trained alone
EMS2 trained alone
joint training, EMS1 view
joint training, EMS2 view
joint training, both EMSs serving (angles pooled over EMS1 and EMS2)
median angle error [deg]
RMSE angle error [deg]
median SNR gain [dB]
exhaustive
total sweeps
