
reflection-only (orange) users, surface 60x60 (synthetic): informed t-SNE (solid) vs searches (dashed), grey = pure t-SNE with other trainings
t-SNE (LUT beam)
t-SNE + 2 neighbours
t-SNE + 4 neighbours
t-SNE + 6 neighbours
greedy search, clusters only
hierarchical search, clusters only
hierarchical search, full codebook
t-SNE, random training
t-SNE, coarse-to-fine training
t-SNE AoA estimate (angle rows)
EMS1 trained alone
EMS2 trained alone
joint training, EMS1 view
joint training, EMS2 view
joint training, both EMSs serving (angles pooled over EMS1 and EMS2)
t-SNE not computed for this training (searches only: they need no training)
median angle error [deg]
RMSE angle error [deg]
median SNR gain [dB]
exhaustive
total sweeps
