
full-NLOS users, surface 60x60 (synthetic): no prior: random t-SNE training codewords (mean of 10 draws), full-codebook hybrids and searches
t-SNE (LUT beam)
t-SNE + 2 neighbours
t-SNE + 4 neighbours
t-SNE + 6 neighbours
greedy search, full codebook
hierarchical search, full codebook
t-SNE AoA estimate (angle rows)
EMS1 trained alone
EMS2 trained alone
joint training, EMS1 view
joint training, EMS2 view
joint training, both EMSs serving (angles pooled over EMS1 and EMS2)
median angle error [deg]
RMSE angle error [deg]
median SNR gain [dB]
exhaustive
