
users reached by EMS1 (full NLOS), colour = true azimuth $\theta_u$
BS
EMS1
y [m]
x [m]
azimuth at EMS1 [deg]
1-D chart, K = 3 slots: median error 2.1°, RMSE 17.8° (356 scored users)
anchors, clamped at their azimuth
10 users of the northern group
placed among the southern one
(large errors: RMSE >> median)
chart coordinate = estimated azimuth $\hat{\theta}_u$ [deg]
